"Accelerating CAR T Cells from the Model T to Driverless”

Dr. Posey will discuss engineered T cell therapies developed to treat cancer, including progress and imitations of translating the success of leukemia treatments to solid tumor treatments.

Thursday
November 16, 2017
12:00 p.m.
Preston Research Building 206

Avery Posey, Jr.
Department of Pathology and Laboratory Medicine
University of Pennsylvania

This lecture series features the most promising young scientists who are making notable discoveries as postdoctoral fellows or early career faculty.
