

All of Us Researcher Onramp

September 28 | 3:30 PM - 5:00 PM CST

[Register to attend virtually!](#)

Researchers/Trainees interested in learning more about the *All of Us* Researcher Workbench are invited to tune into a virtual gathering on September 28 to:

- **Hear a welcome message** from Dr. Paul Harris
- **Get introduced to the *All of Us* Research Program and Research Hub, including the public tools and dataset** by Dr. Adrienne Roman
- **Learn how to register, access, and analyze data** within the *All of Us* Researcher Workbench from Dr. Hiral Master
- **Hear directly from Patrick Wu and Dr. Evan Brittain** about how they leveraged *All of Us* data and tools to power their studies

[Register now!](#)

Who Should Attend?

The Researcher Onramp event will be of most use to current and prospective workbench users, trainees, and early-career investigators who have experience with coding with R/Python and an interest/background in data science. We particularly welcome researchers from groups underrepresented in the scientific workforce. At this time, access to the *All of Us* Researcher Workbench is available to researchers with eRA Commons accounts.

About the Researcher Workbench

The *All of Us* Researcher Workbench is the largest, most diverse biomedical data resource of its kind. Built in partnership with participants spanning different ages, races, ethnicities, and regions of the country, it currently includes **physical measurements, surveys, wearables** and **electronic health records**. **And coming soon....genomics!**

Questions?

Email Ashley Green at ashley.e.green@vumc.org with any questions about the event.
