

Imagine, Invent, Engineer

Inspire the Next Generation of Inventors

Curiosity Machine is a community of scientists, engineers and children creating together. Through this STEM learning platform children are inspired and equipped to create their own inventions with the support of trained and qualified mentors.

Help Children Develop

- Curiosity to understand how things work!
- Creativity to try new ideas!
- Persistence to find a solution despite failure!

Mentor Benefits

- Empower young learners in your local community
- Improve your science communication & mentoring skills
- 1 hour per week commitment, mentor online from anywhere

"I love encouraging young people to be world class creative and critical thinkers and ultimately problem solvers."

Summer 2014 Mentor
