

Postdoc Proceedings

Postdoc Journal invites contributions to a new feature, **Postdoc Proceedings**, a non-refereed, presentation of research data similar to conference and symposia presentations.

All contributions will consist of an abstract and keywords, supplemented with background, materials and methods, the experimental data [positive or otherwise], conclusions and references. We encourage contributors to follow the poster format of data representation in a single PDF file. Authors can also submit video files of invited oral presentations and talks delivered at conferences and symposiums along with the selected abstracts.

For a nominal archiving fee of \$20.00 all proceedings will be assigned a *DOI*, for a permanent record, that can be used for future references/citations as '*unpublished*' data.

Postdocs in **ALL** disciplines are invited to submit their contributions on an ongoing basis. No submission deadline as such.

Submissions can be made [online](#) or sent directly to Editor-in-Chief@PostdocJournal.Com, with Postdoc Proceedings as the subject line.

We appreciate your active contributions.
