

# ABSTRACT BOOK COVER ART COMPETITION

2012 Winner: Jessica Mazerik (Tyska Lab)

The image displays a complex, abstract crystalline structure. The base is a dense, textured field of small, blue and purple particles. From this base, numerous sharp, elongated spires of varying heights rise vertically. These spires are primarily golden-yellow and white at their tips, with some showing a gradient of colors. The overall appearance is reminiscent of a microscopic view of a mineral or a highly ordered molecular lattice. The lighting is dramatic, highlighting the sharp edges and creating a sense of depth and three-dimensionality.
