Health Care as a Platform for Discovery

Presented by:

William Stead, M.D.
Chief Strategy Officer, Vanderbilt University Medical Center
Associate Vice-Chancellor for Health Affairs
McKesson Foundation Professor of Biomedical Informatics
Professor of Medicine

Dr. William Stead will present and discuss Vanderbilt University Medical Center’s approach to harnessing health care for discovery. He will describe four building blocks—delivery system scale, personalization as standard of care, natural language processing-enriched electronic health records, and integrated diagnostics—and explain how these components work together to construct a platform for discovery. This will be an exciting and forward-thinking talk that will discuss how Vanderbilt University Medical Center can position itself to take full advantage of the opportunities leveraged by digitalization and big data management in the health care sector.

FRIDAY, JUNE 17TH, 2016
12:00 PM TO 1:00 PM
407 ABCD LIGHT HALL

*Vanderbilt University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
