Overall Assessment of Intellectual Merit: Excellent
Explanation to the applicant:

Your academic and research background are impressive. You demonstrated well your ability to work independently and also as a team. Your research proposal was also well written. In addition you demonstrated your ability to communicate your research findings. Keep up the good work.

Overall Assessment of Broader Impacts: Good
Explanation to the applicant:

I commend your efforts in peer tutoring and training. Your passion to inspire science in the community is also commendable. To further strengthen the broader impact criterion of your application, it will be helpful to actively participate in the "Scientist in the Classroom Partnership" program as you proposed as well as other outreach programs.

Overall Assessment of Intellectual Merit: Very Good
Explanation to the applicant:

You have an excellent academic record and a solid base of research experience. Your essays are well-written. When writing about past or current projects, be sure to explain the "why" behind the work. Why is the work of interest? Why are these questions/problems important? What will the research lead to? Your research plan is interesting and indicates that you are off to a good start in graduate school.

Overall Assessment of Broader Impacts: Very Good
Explanation to the applicant:

In your essays, you do a very nice job of explaining your interest in quality teaching and outreach opportunities. Your application will be strengthened by further evidence of your commitment to these things. Follow through on your plans and look for additional opportunities to use your leadership skills in reaching out to others in sharing your love for science and research.
