Medical Writing for Clinical Investigators

Course Director: Daniel Byrne, MS
Spring [2 hours credit] Byrne

This course is designed to teach clinical investigators medical writing skills required to publish scientific articles in a peer-reviewed medical journal. Since trainees in the MSCI program are expected to complete their Master’s thesis based on their research project in the Spring of year 2, this course is scheduled prior to this deadline to assist students in writing their thesis/paper. Teaching will consist of demonstrations and discussions of how to improve the writing quality using each student’s thesis-in-progress as an example. Students will be expected to write and revise their Master’s thesis as course-work, no additional written assignments will be required.
