

## **CURRICULUM VITAE**

### **PERSONAL**

Full name **Mohamed Rafiuddin Ahmed**  
Date of Birth **24<sup>th</sup> August 1974**  
Citizenship **US citizen (*Naturalized*)**  
Office Address Department of Pharmacology, Vanderbilt University  
2200 Pierce Ave, PRB 454, Nashville, TN 37232, USA  
Phone 615-438-1411 (Mobile)  
e-mail [mohamed.ahmed@Vanderbilt.edu](mailto:mohamed.ahmed@Vanderbilt.edu)  
[rafiuddin\\_a@yahoo.com](mailto:rafiuddin_a@yahoo.com)

### **EDUCATION**

#### **2020-Present**

#### **Research Assistant Professor**

Department of Pharmacology  
Vanderbilt University, Nashville, Tennessee

Field of Study Regulation of GPCR mediated signaling with special emphasis on G proteins, GRKs, Arrestins and MAP kinases in cellular and animal models of diseases & disorders.

#### **2016-2020**

#### **Senior Scientist**

BioADD Laboratories  
Stanford University, Palo Alto CA 94304

Field of Study Risk assessment and toxicity of formulations developed for Unmet medical diseases/disorders, small molecule biotherapeutics, drug discovery in Parkinson's disease and Receptor mediated Signaling studies.

#### **2010 – 2016**

#### **Research Instructor**

Institution and Location: Department of Pharmacology, Vanderbilt University Medical Center,  
Nashville, Tennessee

Field of Study Regulation of GPCR mediated behavior and signaling in neuropsychiatric diseases and disorders which special emphasis on G proteins, GRKs, Arrestins and MAP kinases.

#### **2003 – 2010**

#### **Post-doctoral Training**

Institution and Location: Department of Pharmacology, Vanderbilt University Medical Center,  
Nashville, Tennessee

Mentor: Eugenia V Gurevich, Ph.D.

Field of Study Dopamine mediated behavior and signaling in neuropsychiatric diseases and disorders.

#### **1999 – 2003**

#### **Ph.D. (Degree Awarded March 2004)**

Institution and Location: Degree Awarded in **Environmental Toxicology/Neurochemistry**  
Central Leather Research Institute (CLRI/CSIR)  
University of Madras, Chennai India

Mentor: Rajadas Jayakumar, Ph.D.

Dissertation Title: Development of Peptide Incorporated Collagen Tubules for Peripheral Nerve Regeneration in a Rat Sciatic Nerve Model.

#### **1995 - 1997**

#### **M.S**

Institution and Location: University of Madras, Chennai India

Field of Study: **Environmental Toxicology**

**1992-1995**

Institution and Location:

Field of Study:

**B.S**

University of Madras, Chennai India

**Zoology**

### **ACADEMIC APPOINTMENTS**

1997 – 1999 Junior Research Fellow in collaboration with EYE RESEARCH CENTER / Dr. Agarwal's Eye Hospital and Central Leather Research Institute/Council of Scientific and Industrial Research, Chennai, India

2000 – 2003 Senior Research Fellow Central Leather Research Institute/Council of Scientific and Industrial Research, Chennai, India

2003 – 2010 Postdoctoral Research Fellow, Department of Pharmacology Vanderbilt University, Nashville, TN

2010 – 2016 Research Instructor (Research Faculty), Department of Pharmacology, Vanderbilt University, Nashville, TN

2016 – 2020 Senior Scientist, BioADD Laboratories, Stanford University, Palo Alto CA

2020 - Present Research Assistant Professor, Department of Pharmacology Vanderbilt University, Nashville TN

### **RESEARCH GRANTS SUBMITTED TO NIH**

#### **Applied in June 2014, (Applied, Not Funded)**

1K01DA039312-01 Ahmed (PI) 4/1/15-3/30/20  
NIH/NIDA total funds requested \$599,779

#### ***Arrestin3 Signaling In Psychostimulant Addiction***

The studies will focus on the consequences of in vivo overexpression of Arrestin3 in specific striatal regions and sub-population of neurons in chronic psychostimulant addiction and relate them to the mechanistic signaling pathways in the brains in drug addiction. This is a training grant which will provide protected time of 5 years to the PI in order to establish in the field of drug addiction and submit a R01 research proposal in years 4 and 5 of the protected time.

#### **Applied in June 2011, (Applied, Not Funded)**

1R21NS0783-01 Ahmed (PI) 4/1/12-3/30/14  
NIH/NINDS total funds requested \$275,000

#### ***Altered Signaling and Role of Arrestins in Parkinson's disease***

This study focused on the role of Arrestin3 in Parkinson's disease and L-DOPA induced dyskinesia. The highlight of this research is that the Arrestin3KO mice had reduced dyskinetic behavior with chronic L-DOPA treatment than their WT littermates and Arrestin2KO mice. I wanted to probe the signaling effects with the lack of Arrestin3 protein in the striatum, the region responsible for body movements.

### **TEACHING EXPERIENCE**

Cell and Molecular biology, Pharmacology and Toxicology, Behavioral Neuroscience and Neurochemistry, Biomaterials and Tissue engineering.

**1999-2003** - Taught collagen and drug incorporated collagen biomaterials preparation for biomedical applications like wound healing, nerve regeneration and drug delivery to undergraduate trainees, project fellows and junior research fellows at Central Leather Research Institute, Chennai, India.

**2003** – Present: Trained undergraduate and graduate students in molecular cloning, Lentivirus production for transgene applications, toxicity studies, Stereotaxic surgeries in rodents for brain injections and Animal behavior to study Parkinson's disease, drug addiction at Vanderbilt University, Nashville, TN, USA.

### **STUDENTS SUPERVISED**

Student Project Co-ordinator at CLRI/CSIR, Chennai, India and IGP PhD Rotation and Undergraduate Students Supervised (over 25 students) at Vanderbilt University, Nashville TN.

## **AWARDS AND HONORS**

- 1) Awarded **Senior Research Fellowship (SRF)** during the period 2000-2003 from Council of Scientific and Industrial Research (CSIR), India.
- 2) Awarded **best (second) paper presentation award** in 6<sup>th</sup> International Wound healing Conference held at Central Leather Research Institute, Chennai conducted by Indian Wound Management Society on Feb 22-23, 2003.

## **RESEARCH RESOURCES CREATED**

- Parkinson's disease (PD), drug addiction animal modeling,
- Rodent neurobehavior for PD and drug addiction,
- Standardized Lentivirus, AAV mediated gene transfer for gene therapy
- Fabrication of Biomaterials for Skin wound healing, nerve tissue regeneration
- Liposomal delivery of drugs and protein for biotherapeutics.
- Toxicity studies of allergens, protein therapeutics and synthetic drugs.

## **MEMBERSHIPS**

2004-Present	Society for Neuroscience
2012-Present	ASPET
2014-Present	FASEB

## **MANUSCRIPT REVIEW**

2004 -	Adhoc Reviewer for Brain Research
2008 -	Adhoc Reviewer for Neurobiology of Aging
2009 -	Adhoc Reviewer for Journal of Neurochemistry
2010-	Adhoc Reviewer for Polymers for Advanced Technologies
2011-	Adhoc Reviewer for Advanced Biomaterials
2011-	Journal of Biomedical Materials Research –Part B
2011-	Parkinson's.Org <sup>UK</sup> (Peer Reviewer for Grant Applications)
2014-	Adhoc Reviewer for ACS Applied Materials & Interfaces
2014-	Adhoc Reviewer for Springerplus
2015-	Adhoc Reviewer for Scientific Reports (Nature Family)
2016-	Adhoc Reviewer for International Journal of Biological Macromolecules

## **PUBLICATIONS**

- 1) Intranasal delivery of liposome encapsulated flavonoids ameliorates L-DOPA induced dyskinesia in hemiparkinsonian mice. **Ahmed MR**, Inayathullah M, Morton M, Pothineni VR, Kim K, Ahmed MS, Babar MM, and Rajadas J (In Revision; *Biomaterials* (Current IF-14) 2024).
- 2) Arrestin-3-assisted activation of JNK3 mediates dopaminergic behavioral and signaling plasticity in vivo. **Ahmed MR**, Zheng C, Dunning JL, Ahmed MS, Ge C, Sanders Pair F, Gurevich VV, Gurevich EV. bioRxiv. 2023 Oct 30:2023.10.27.564447. doi: 10.1101/2023.10.27.564447. Preprint. PMID: 37961199 (In Revision; *Cell Reports Medicine* (Current IF-14.3) 2024).
- 3) Kook S, Zhan X, Thibeault K, **Ahmed MR**, Gurevich VV, Gurevich EV. Mdm2 enhances ligase activity of parkin and facilitates mitophagy. *Sci Rep*. 2020 Mar 19;10(1):5028. doi: 10.1038/s41598-020-61796-4. PMID: 32193420.
- 4) **Ahmed MR**, Jayakumar M, Ahmed MS, Zamaleeva AI, Tao J, Li EH, Job JK, Pittenger C, Ohtsu H, Rajadas J. Pharmacological antagonism of histamine H2R ameliorated L-DOPA induced dyskinesia via normalization of GRK3 and by suppressing Fos B and ERK in PD. *Neurobiol Aging* 2019 Sep; 81: 177-189. doi:10.1016/j.neurobiolaging.2019.06.004.Epub2019 Jun19. PMID: 31306812.
- 5) Kim KM, Zamaleeva AI, Lee YW, **Ahmed MR**, Kim E, Lee HR, Pothineni VR, Tao J, Rhee S, Jayakumar M, Inayathullah M, Sivanesan S, Red-Horse K, Palmer TD, Park J, Madison DV, Lee HY,
