Office of Biomedical Research Education and Training Presents:

Vanderbilt University Summer Science Academy Fifteenth Annual Research Symposium

Thursday August 3rd, 2017

Schedule:
Poster Session One: 10:00 AM – 12:00 PM
Research Seminar: 12:00 PM – 1:00 PM
Poster Session Two: 1:30 PM – 3:30 PM
Student Research Talks: 3:30 PM – 4:30 PM
Award Ceremony: 4:30 PM – 5:00 PM

The Wond’ry, Vanderbilt University
The Vanderbilt University Summer Science Academy is pleased to present the fifteenth annual Summer Research Symposium.

Vanderbilt University has a longstanding tradition of training undergraduates in the Biomedical Sciences through summer research programs. In 2003, the Office of Biomedical Research Education & Training established the Vanderbilt Summer Science Academy to bring together all undergraduates conducting biomedical research across the university. Currently, there are twenty research programs participating in the academy. Together we host approximately 100 students each summer from institutions across the country.

This symposium serves to showcase the accomplishments and skills that each student obtained while working on their own independent research projects during their 9 weeks at Vanderbilt. The students present their research results in poster format for faculty mentors, fellow students and staff.

Thank you for attending!

**Schedule:**

**Poster Session One**
- Set up: 9:30 AM – 10:00 AM
- Presentation: 10:00 AM – 12:00 PM
- Take down: 12:00 PM – 1:15 PM

**Research Seminar & Lunch, 12:00 PM – 1:00 PM**

**Poster Session Two**
- Set up: 1:15 PM – 1:30 PM
- Presentation: 1:30 PM – 3:30 PM
- Take down: 3:30 PM – 5:00 PM

**Student Research Talks and Award Ceremony, 3:30 PM – 5:00 PM**
Thursday, August 3rd, 2017

Poster Session One 10:00 AM – 12:00 PM:
• BP-ENDURE – Blueprint Program for Enhancing Neuroscience Diversity through Undergraduate Research Education Experiences (Pg 7)
• Chemical Biology Research Experience for Undergraduates (Pg 7-8)
• Vanderbilt Summer Diabetes Research Program (Pg 9)
• Leadership Alliance (Pg 9-10)
• MCB – Molecular and Cellular Biology Summer Program (Pg 11)
• MSTP SRP – Medical Scientist Training Program Summer Research Program (Pg 10)
• Physics Research Experience for Undergraduates (Pg 11-12)
• Physics Summer Research Interns (Pg 13)
• SERPENT – Summer Enrichment Research Program in Education and Neuroscience Training (Pg 13)
• U-CRIP – Vanderbilt Undergraduate Clinical Research Internship Program (Pg 14-15)
• V-SURE – Vanderbilt-Sewanee Undergraduate Research Experience (Pg 17)
• VMSRP – Vanderbilt Minority Summer Research Program (Pg 18-19)

Poster Session Two 1:30 PM – 3:30 PM
• Vascular Biology – Short Term Training Program for Minority Students (Pg 16-17)
• VI4 – Vanderbilt Institute of Infection, Immunology, and Inflammation (Pg 19)
• VICC-CURE – Vanderbilt-Ingram Cancer Center, Cancer Undergraduate Research Experience (Pg 20)
• VINSE – Vanderbilt Institute of Nanscale Science and Engineering (Pg 21-22)
• VPNGV – Vanderbilt Program in Next Generation Vaccines (Pg 22)
• VVC – Vanderbilt Vaccine Center (Pg 23)
• Independent Students (Pg 23-24)

Student Research Talks & Award Ceremony 3:30 PM – 5:00 PM:
• Pg 6

Student Poster and Presentation Index:
• Pg 25
Presentation Titles
Student Oral Presentations

Student Speakers (3:30-4:30)

Christin Anthony, MCB
Clemson University
“Mcl-1 promotes pluripotency in human embryonic stem cells (hESCs) through modulation of mitochondrial dynamics”
Vivian Gama, Ph. D. Department of Cell and Developmental Biology

Jordan Galbraith, Vascular Biology STTP
Vanderbilt University
“Investigating the Metabotropic Glutamate Receptor 1 Subtype for Motivational Dysfunction in Schizophrenia”
Jeffrey Conn, Ph.D. Department of Pharmacology

Eli Solomon, UCRIP
Wesleyan University
David Charles, M.D. Department of Neurology

Erin Elizabeth Tamulonis, Independent
University of Mount Union
“KATP channels sense alterations in shear stress and regulate ductus arteriosus tone”
Elaine Shelton, Ph.D. Department of Pediatrics

Erin Elizabeth Uhelski, Chemical Biology REU
Michigan State University
“A Pipeline for Structural Characterization of Protein Targets from Staphylococcus aureus and Acinetobacter baumannii”
Eric Skaar, Ph.D. Department of Pathology, Microbiology and Immunology

Honorable Mention:
Katherine McDonald, Diabetes
Michael Scaglione, MCB
Sara Shaghaghi, Vascular Biology STTP

Award Presentations

Poster Presentation Awards (6)
Oral Presentation Awards (2)
BP-ENDURE

Poster Session One (10:00-12:00)

**Itzik Nahmoud (1-1)**
Hunter College of the City University of New York
“Identification of Surrogate Markers for Malignant Cell Types in Anaplastic Astrocytomas”
Michael Cooper, M.D. Department of Neurology

**Alec T Seidenberg (1-2)**
Hunter College of the City University of New York
“Intrinsic BNST Function in Post-Traumatic Stress Disorder”
JU Blackford, Ph.D. Department of Psychiatry and Behavioral Sciences

**Jordy Sepulveda (1-3)**
Hunter College of the City University of New York
“BDNF down-regulation in Huntington’s Disease mouse model upon Manganese exposure.”
Aaron Bowman, Ph.D. Department of Neurology

Chem-Bio REU

Poster Session One (10:00-12:00)

**Minu-Tshyeto Bidzimou (1-4)**
Grinnell College
“Progress Towards the Total Synthesis of Chrysophaeatin A”
Gary Sulikowski, Ph.D. Department of Chemistry

**Lee Cantrell (1-5)**
Whitworthrell (1-5)
Whitworth University
“Determining the Absolute Configuration of Inuloxin A: A Chiroptical Study”
Prasad Polavarapu, Ph.D. Department of Chemistry

**Amanda Lyn Cao (1-6)**
California State Polytechnic University, Pomona
“Using 2D Infrared Spectroscopy to Visualize Amyloid-Crystalline Structure Reversibility in Cholecystokinin and Gastrin Fragments”
Lauren Buchanan, Ph.D. Department of Chemistry

**Gabriel D'Agostino (1-7)**
University of South Carolina
“An investigation of secondary metabolite production stimulus in Myxobacterium”
Brian Bachmann, Ph.D. Department of Chemistry
Poster Session One (10:00-12:00)

Lauren Harris (1-8)
University of Maryland, Baltimore County
“Internalization Dynamics of the Disease-Associated Dopamine Transporter A559V Variant”
Sandra Rosenthal, Ph.D. Department of Chemistry

Hyungyu Lee (1-9)
Bowdoin College
“Catalytic Asymmetric Carboxylic Acid Activation in the Enantioselective Iodolactonization of Symmetric Alkenes”
Jeffrey Johnston, Ph.D. Department of Chemical Biology

Emily Jeanne Lilla (1-10)
Michigan Technological University
“Development of a non-competitive antagonist for the Protease-Activated Receptor-4”
Craig Lindsley, Ph.D. Department of Pharmacology

Claire Mammoser (1-11)
Valparaiso University
“Concentration of Circulating Anodic Antigen for Low-Resource Diagnosis of Schistosomiasis”
David Wright, Ph.D. Department of Chemistry

Edgar Mariano Marroquin (1-12)
University of Texas, Austin
“Modeling the recognition and excision of the Aflatoxin-B1-FAPY-dG DNA adduct by mvNEI1”
Michael Stone, Ph.D. Department of Chemistry

Audrey Kathryn Thomas (1-13)
Kalamazoo College
“Streamlined structural pipeline for Clostridium difficile proteins differentially expressed in the absence of TcdA/TcdB toxins”
D. Borden Lacy, Ph.D. Department of Pathology, Microbiology and Immunology

Erin Elizabeth Uhelski (1-14)
Michigan State University
“A Pipeline for Structural Characterization of Protein Targets from Staphylococcus aureus and Acinetobacter baumannii”
Eric Skaar, Ph.D. Department of Pathology, Microbiology and Immunology
Diabetes

Poster Session One (10:00-12:00)

Hanson Cowan (1-15)
University of South Carolina
“The Effect of Diet on Levels of N-acylphosphatidylethanolamines (NAPEs) and N-acylethanolamides (NAEs)”
Sean Davies, Ph.D. Department of Clinical Pharmacology

Chloe Elizabeth Ibsen (1-16)
Vanderbilt University
“Investigating the role of TALK-1 in modulating ER stress and β-cell dysfunction”
David Jacobson, Ph.D. Department of Molecular Physiology and Biophysics

Katherine McDonald (1-17)
The University of Chicago
“Pdx1/Oc1 Double Heterozygosity Affects Regulatory Transcription Factor Expression Important for β-cell Development”
Maureen Gannon, Ph.D. Department of Medicine

Leadership Alliance & SPURT

Poster Session One (10:00-12:00)

Robinson A De Jesus-Romero (1-18)
University of Puerto Rico, Rio Piedras campus
“Testing white matter integrity as a predictor of conversion from conduct disorder to antisocial personality disorder using DTI”
David Zald, Ph.D. Department of Psychological Sciences

Carlos R Detres Roman (1-19)
University of Puerto Rico, Aguadilla
“Defining amino acids required for oligomerization of Helicobacter pylori VacA toxin”
Timothy Cover, M.D. Department of Medicine

Andy Jacques Dorfeuille (1-20)
Morehouse College
“Investigating the effects of mutated radical holding residues on DNA charge transport”
Walter Chazin, Ph.D. Department of Biochemistry
**Leadership Alliance & SPURT**

**Poster Session One (10:00-12:00)**

**Bretton P Nabit (1-21)**
Rider University
“Evaluating the role of α2A-adrenergic receptors in neuronal activity changes following stress-induced reinstatement of cocaine-seeking behaviors”
Danny Winder, Ph.D. Department of Molecular Physiology and Biophysics

**Thomas Rechtman (1-22)**
University of Central Florida
“Inverse Problems in Geomagnetism”
Douglas Hardin, Ph.D. Department of Mathematics

**Danielle Renea Rodriguez (1-23)**
Heritage University
“Investigation into PPP1ca and Hdac2 activities in immediate early gene transcription”
David Sweatt, Ph.D. Department of Pharmacology

**Ja'kayla Mershae Sterling (1-24)**
Dillard University
“What factors play an important role in determining whether someone is externally or internally focused”
Daniel Levin, Ph.D. Department of Psychology

**MSTP SRP**

**Poster Session One (10:00-12:00)**

**Jessica Adrianna Robinson (1-25)**
Norfolk State University
“The Impact of Single Nucleotide Polymorphisms on Ecto-nucleotidase Activities”
Richard Gumina, M.D., Ph.D. Department of Medicine

**Ariella Saslafsky (1-26)**
University of Central Florida
“Sympathetic Innervation of Pancreatic Islets in Individuals with Type 1 Diabetes (T1D)”
Alvin Powers, M.D. Department of Medicine
Poster Session One (10:00-12:00)

Christin Anthony (1-27)
Clemson University
“Mcl-1 promotes pluripotency in human embryonic stem cells (hESCs) through modulation of mitochondrial dynamics”
Vivian Gama, Ph. D. Department of Cell and Developmental Biology

Michael Scaglione (1-28)
The University of Alabama
“Bruton's Tyrosine Kinase (BTK) Regulation of Autoantibody Production in Spontaneous Arthritis”
Peggy Kendall, M.D. Department of Medicine

Philip Evan Stauffer (1-29)
Virginia Tech
“Enzymatic Characterization of the Zika Virus RNA-Dependent RNA Polymerase, NS5”
Frederick Guengerich, Ph.D. Department of Biochemistry

Hailey M Ung (1-30)
Sewanee: The University of the South
“The Dynamic Relationship Between DNA Methylation and Chromatin Accessibility During Cell Differentiation”
Emily Hodges, Ph.D. Department of Biochemistry

Physics REU

Poster Session One (10:00-12:00)

Haley Buckner (1-60)
West Chester University of Pennsylvania
“The Coupling of Maxwell and Schrodinger Equations”
Kalman Varga, Ph.D. Department of Physics & Astronomy

Tracy Edwards (1-61)
Hampton University
“Deciphering the biochemical and biomechanical roles of the amnioserosa in morphogenesis during germ band retraction.”
Shane Hutson, Ph.D. Department of Physics & Astronomy
Poster Session One (10:00-12:00)

**Dale Julson (1-62)**
Texas State University
“A Search for Dark Matter Through Vector Boson Fusion Topology”
Alfredo Gurrola, Ph.D. Department of Physics & Astronomy

**Sam Llaneta (1-63)**
Case Western Reserve University
“Dissecting the Angular Momentum of Dark Matter Halos”
Andreas Berlind, Ph.D. Department of Physics & Astronomy

**Justin Malave (1-64)**
Baldwin-Wallace University
“Hunting Further Neutrino Flavor Eigenstates”
David Ernst, Ph.D. Department of Physics & Astronomy

**Cecelia McRoberts Legg (1-65)**
Pacific Lutheran University
“Re-evaluation of Reactor Antineutrino Anomaly Results in Search of the Fourth Neutrino”
David Ernst, Ph.D. Department of Physics & Astronomy

**Richard Nederlander (1-66)**
Columbia University
“Radiation Characterization of Silicon Avalanche Photodiode”
Keivan Stassun, Ph.D. Department of Physics & Astronomy

**Zameese Emil Peters (1-67)**
Norfolk State University
“Is it possible to embed an Astronomy common sense into an Artificial Intelligence system in order to create meaningful scatterplots”
Keivan Stassun, Ph.D. Department of Physics & Astronomy

**Joshua Robinson (1-68)**
University of Michigan - Ann Arbor
“Zinc Oxide Nano-wire Lasing”
Richard Haglund, Ph.D. Department of Physics & Astronomy

**John Thomas (1-69)**
Fisk University
“Small Satellite Internal Communication Architecture for Positioning Systems”
Keivan Stassun, Ph.D. Department of Physics & Astronomy
Physics Interns

Poster Session One (10:00-12:00)

**Yuhan Guo (1-70)**
Vanderbilt University
“Frozen Orbital Time-Dependent Density Functional Theory (TDDFT) for Current Calculations”
Kalman Varga, Ph.D. Department of Physics & Astronomy

**Christian Ornelas (1-71)**
University of Illinois - Champaign
“Transition Metal Impurities in PtSe₂”
Sokrates T. Pantelides, Ph.D. Department of Physics & Astronomy

**Michael Saavadra (1-72)**
Case Western University
“Two-Photon Emission in Hybrid Metallic Nanoparticles”
Richard F. Haglund, Ph.D. Department of Physics & Astronomy

**Tyler Summers (1-73)**
Pennsylvania State at Behrend
“Properties of Oxygen and Hydrogen in Porous Amorphous SiC”
Sokrates T. Pantelides, Ph.D. Department of Physics & Astronomy

**Xiaojia (XJ) Xu (1-74)**
Vanderbilt University
“Simulation of Laser-Induced Rectification in a Nanoscale Vacuum-tube Diode”
Kalman Varga, Ph.D. Department of Physics & Astronomy

SERPENT

Poster Session One (10:00-12:00)

**Trevor William Simon (1-31)**
Vanderbilt University
“Neuronal Cultures with Parvalbumin (PV)-dependent Expression of the tdTomato Fluorescent Protein as a Model System to Study Injury to PV Fast-Spiking GABAergic Interneurons”
Laura Dugan, M.D. Department of Department of Medicine
Poster Session One (10:00-12:00)

Antonia Bruce (1-32)
North Carolina A&T
“Zebrafish Screening”
Charles Hong, M.D., Ph.D. Department of Cell and Developmental Biology

Ruth Dunn (1-33)
Louisiana State University
“Comparison of Human Metapneumovirus Viral Loads in Children Seen in Emergency Department to Those Hospitalized”
Natasha Halasa, M.D., M.P.H. Department of Pediatric Infectious Disease

Zoe R Finer (1-34)
University of Michigan
“Transgenerational Cardiac Defects from Maternal Dioxin Exposure”
Rolanda Lister, M.D. Department of Obstetrics and Gynecology

Sarah Nicole Grossarth (1-35)
Tennessee Technological University
“Apples and oranges: Differential transcriptomic and protein response between cord and peripheral blood in neonates”
Hendrik Weitkamp, M.D. Department of Pediatrics

Allison Mae Harper (1-36)
Berea College
“Collection of Additional Variables which Contribute with Hospitalized Influenza Severity Score Construction among Patients 2016-2017”
Helen Keipp, M.D., M.P.H. Department of Epidemiology

Reginald Demarcus Jackson (1-37)
Fisk University
“How have Hospital Closures in Tennessee Affected Communities?”
Sayeh Nikpay, Ph.D. Department of Health Policy

LeAnn Lam (1-38)
University of Utah
“A Randomized Controlled Trial to Reduce Excess Opioids After Cesarean Delivery”
Sarah Osmundson, M.D., M.S. Department of Obstetrics & Gynecology
Poster Session One (10:00-12:00)

**Dominique Alyssa Mosley (1-39)**
Spelman College
“The Association of Meat Intake Meat Cooking Methods, and Meat-Derived Mutagen Exposure with the Risk of Colorectal Polyps Including Sessile Serrated Adenomas”
Martha Shrubsole, Ph.D. Department of Epidemiology

**Jackson Pearce (1-40)**
Furman University
“Retinoic acid metabolism blocking agents (RAMBAs) enhance repair after acute kidney injury (AKI)”
Mark de Caestecker, M.B., B.S., Ph.D. Department of Medicine

**Cody Ryan Sain (1-41)**
University of Tennessee - Knoxville
“Improving Compliance with Lung Protective Ventilation: Modification of Default Ventilator Settings is More Effective than Clinical Decision Support”
Jonathan Wanderer, M.D., M.Phil. Department of Anesthesiology

**Eli Solomon (1-42)**
Wesleyan University
David Charles, M.D. Department of Neurology

**Matthew Young (1-43)**
Morehouse College
“Assessing Mortality and Retention in Loss to Follow Up HIV Patients through Mortality Data Validation Protocol”
Timothy Sterling, M.D. Department of Infectious Diseases

**Marah Zeidan (1-44)**
Berea College
“Improving Long-Term Outcomes in Retinoblastoma Survivors”
Debra Friedman, M.D., M.S. Department of Pediatrics

**Ryan Gerard Zinone (1-45)**
University of Notre Dame
“Cancer Disparities among Lesbian, Gay, and Bisexual Adults: An Analysis of the 2013-2015 National Health Interview Surveys”
Gilbert Gonzales, Ph.D. Department of Health Policy
Vascular Biology

Poster Session Two (1:30-3:30)

**Meagan Branch (2-1)**
Elon University
“The role of discoidin domain receptor tyrosine kinase 1 in the process of fibrosis”
Ambra Pozzi, Ph.D. Department of Medicine

**Grady Clopton (2-2)**
Tennessee State University
“Development of chemotype-phenotype database in zebrafish”
Chaz Hong, M.D., Ph.D. Department of Medicine

**Jordan Galbraith (2-3)**
Vanderbilt University
“Investigating the Metabotropic Glutamate Receptor 1 Subtype for Motivational Dysfunction in Schizophrenia”
Jeffrey Conn, Ph.D. Department of Pharmacology

**Micah Harris (2-4)**
Wright State University
“Bedside Monitoring: Technical instability impacting patient safety”
Lisa Weavind, M.D. and Robert Freundlich, M.D. Department of Anesthesiology

**Jaelynn Alexis Lawrence (2-5)**
University of Alabama, Birmingham
“Investigating the Mechanisms of Gli2 Regulation of Parathyroid Hormone Related Protein Expression and Bone Destruction in Tumor-Induced Bone Disease”
Julie Sterling, Ph.D. Department of Clinical Pharmacology

**Sarah Nicole Magee (2-6)**
The Pennsylvania State University
“Hepatic Ferroportin Expression Altered by HD and Mn Exposure”
Aaron Bowman, Ph.D. Department of Pediatrics

**Adrienne Montero (2-7)**
University of North Carolina, Charlotte
“Caffeine-associated Reduction in Patent Ductus Arteriosus (PDA) is Mediated by Adenosine Receptor Antagonism”
Jeff Reese, M.D. Department of Neonatology

**Nicky Quinones (2-8)**
East Carolina University
“Physical Activity and its Association with Cognition in Older Adults: The Vanderbilt Memory & Aging Project”
Angela Jefferson, Ph.D. Department of Neurology
Vascular Biology

Poster Session Two (1:30-3:30)

Sara Shaghaghi (2-9)
University of Dayton
“Towards a 100-Fold more sensitive TB diagnostic based on the coffee ring phenomena”
Frederick Haselton, Ph.D. Department of Biomedical Engineering

CheyAnne Quinn Youngblood (2-10)
Northeastern State University
“Sugars of the Glycosylation Salvage Pathway Control Wnt in the Early Embryo”
Ethan Lee, M.D., Ph.D. Department of Cell and Developmental Biology

V-SURE

Poster Session One (10:00-12:00)

Trey Claus (1-46)
Sewanee: The University of the South
“Induction of Cancer Cell Death via the Inhibition of Amino Acid Uptake”
Charles Manning, Ph.D. Department of Radiology and Radiological Sciences

Elizabeth Ashby Gill (1-47)
Sewanee: The University of the South
“Identifying decidual cell-derived heat resistant factor(s) that limit macrophage tumor necrosis factor-α production in response to lipopolysaccharide challenge”
David Aronoff, M.D. Department of Medicine

Sean Halloran (1-48)
Sewanee: The University of the South
“The Importance of Conformational Mobility to the Post-Attachment Functions of Reovirus σ1 Attachment Protein”
Kristen Ogden, Ph.D. Department of Pediatrics

Jacqueline Marie Spangenberg (1-49)
Sewanee: The University of the South
“Investigating the Role of MYBPC3 in Murine Cardiomyocyte Growth”
Jason Becker, M.D. Department of Cardiovascular Medicine
Poster Session One (10:00-12:00)

Mary Chalkley (1-50)
Barnard College of Columbia University in the City of New York
“Determining the role of Cullin9 in neuronal differentiation of human pluripotent stem cells (hPSCs)”
Vivian Gama, Ph.D. Department of Cell and Developmental Biology

Carlos Cosme Jr. (1-51)
Amherst College
“The Role of RAD51 in de novoTelomere Addition”
Katherine Friedman, Ph.D. Department of Cell and Developmental Biology

Elizabeth Fashakin (1-52)
Vanderbilt University
“Anterior-Posterior Analysis of Neuronal Distribution Across the Left and Right Hemispheres of New World Monkeys”
Jon Kaas, Ph.D. Department of Psychology

John-Anthony Fraga (1-53)
Yale University
“Isolation and characterization of human monoclonal antibodies for novel antiviral treatments of Ross River and rabies viruses”
James Crowe, M.D. Department of Pediatrics

Rachel Alicia Francis (1-54)
Sewanee: The University of the South
“Mechanisms of Retinal Regeneration in Zebrafish”
James Patton, Ph.D. Department of Biological Sciences

Alexis L Gutierrez (1-55)
Vanderbilt University
“KRAS-dependent sorting of long RNAs into exosomes”
James Patton, Ph.D. Department of Biological Sciences

Andrew Ryan Kittleson (1-56)
Northwestern University
“Circadian A-to-I RNA editing in the central nervous system”
Ronald Emeson, Ph.D. Department of Pharmacology

Amanda Nicole Mitchell (1-57)
Columbia University in the City of New York
“Identifying Molecular Targets of UNC-4 That Maintain Synaptic Specificity in the C. elegans Motor Neuron Circuit”
David M. Miller, III, Ph.D. Department of Cell and Developmental Biology
**Poster Session One (10:00-12:00)**

**Maureen Nwizu (1-58)**
Vanderbilt University

“On the evolutionary origins of CD1d and semi-invariant natural killer T cells”
Sebastian Joyce, Ph.D. Department of Pathology, Microbiology and Immunology

**Luwi Shamambo (1-59)**
Vanderbilt University

“Using protein purification to isolate constructs of the Glo3 protein”
Lauren Jackson, Ph.D. Department of Biological Sciences

**Poster Session Two (1:30-3:30)**

**Tomas Bermudez (2-11)**
Sewanee: The University of the South

“Utilizations of Uropathogenic E. coli Transposon Library to Identify Oxygen-Dependent Biofilm Regulators”
Maria Hadjifrangiskou, Ph.D. Department of Pathology, Microbiology & Immunology

**Austin Southard-Smith (2-12)**
University of North Carolina, Chapel Hill

“Characterizing cooperative bacterial species associated with Corynebacterium bovis infection induced hyperkeratosis in mice.”

Raymond Blind, Ph.D. Departments of Medicine

**Mark Rusznak (2-35)**
Pomona College
“Glucagon-like peptide-1 receptor signaling attenuates RSV-induced type 2 responses and immunopathology”
Stokes Peebles, M.D. Department of Medicine

**Hitesh Vaishnav (2-37)**
Tennessee State University
“Metastatic Prostate Tumors in Bone”
Julie Sterling, Ph.D. Department of Pharmacology

**Byron Young II (2-38)**
Tennessee State University
“Functions of MYC and WDR5 in Cancer”
William Tansey, Ph.D. Department of Cell and Developmental Biology
### Student Poster and Page Index

Posters starting with “1.” present at Poster Session One: 10:00-12:00
Posters starting with “2.” present at Poster Session Two: 1:30-3:30

The **Interdisciplinary Graduate Program (IGP)** is a leading integrative biomedical graduate PhD program, designed to foster well-rounded science leaders. Since its inception in 1992, the IGP has provided comprehensive training for our students, bridging traditional biomedical fields. Our students learn how to be creative and analytical thinkers, geared to tackle the quickly evolving world of research and technology. As a union between 11 participating programs, the IGP provides a strong foundational jumping point for biomedical dissertation work.

medschool.vanderbilt.edu/igp/

The **Quantitative and Chemical Biology (QCB)** program is a PhD track, multidisciplinary program introducing elements of biology to students who wish to pursue a doctoral degree at the interface of the chemical, physical, and biological sciences. The curriculum prepares students for research careers in any area of biomedical research. Many students choose to work in interdisciplinary fields such as chemical biology, structural biology, imaging sciences, molecular and cellular biophysics, or systems biology. Previous didactic training in the biological sciences is not required for entry into the QCB.

medschool.vanderbilt.edu/qcb/

The **Chemistry PhD** program is a PhD track, highly competitive, ACS-accredited graduate program in a collegial atmosphere that nurtures individual goals, fosters innovation and collaboration, and opens doors to a wide variety of professional goals.

vanderbilt.edu/chemistry/grad-prospective.php

The **Medical Scientist Training Program (MSTP)** prepares students for faculty and research positions of leadership in the biomedical sciences. At the heart of our MSTP is the conviction that the approach to problem-solving characteristic of PhD training is the most effective pathway to educate first-rate medical scientists. Our program provides students with an integrated curriculum that features a strong core education in medicine and intensive training in scientific inquiry. Successful completion of the program leads to both the MD and PhD degrees.

The Vanderbilt University School of Medicine Summer Science Academy Research Symposium is supported by the following funding support

• BP-ENDURE Neuroscience; Hunter College, CUNY & New York University

• National Science Foundation: REU in Chemical Biology, NSF/REU Nanoscale Science and Engineering

• National Institute of Health: The Minority Summer Research Program/NHLBI, and the Short Term Training Program for Minority Students/NHLBI, Cancer Center Support Grant, CURE Supplement/NCI

• Vanderbilt: The Vanderbilt Graduate School Department of Chemistry, Vanderbilt Institute of Chemical Biology, Vanderbilt Diabetes Center, Vanderbilt Vaccine Center, Vanderbilt-Ingram Cancer Center, Vanderbilt Medical Scientist Training Program, and the Vanderbilt Office of Biomedical Research Education & Training

• The Society for Neuroscience
Senior Associate Dean of Biomedical Research Education and Training
Roger Chalkley, D.Phil

Vanderbilt Summer Science Academy Directors
Elizabeth A. Bowman, Ph.D.
Christina K. Keeton, Ph.D

Administrative Officer, Biomedical Research Education and Training
Ted Gilbert

Vanderbilt Summer Science Academy
Office of Biomedical Research Education and Training
