

Training Grant in Microenvironment Influences in Cancer PARTICIPATION AGREEMENT

Please check applicable boxes. Electronic signatures are acceptable or a scanned hard copy may be sent as a separate pdf.

The undersigned agree to participate in the following required Training Program activities:

1. Participate in Science Hours
2. Participate in annual Tumor-Host Program Retreat
3. Participate in "Clinical Experience"
4. Enroll and perform the course work for the required courses (for students):
 - a. Cancer Biology 340: Introduction to Cancer Biology
 - b. Cancer Biology 342: Advanced Concepts in Cancer Biology
5. Submit annual progress reports to the Training Grant Director for review by the Internal Advisory Committee.
6. Participate in "paired mentoring" to mentor junior students/fellows after completing the first two years in this program.
7. Participate in annual RCR small group discussion (for both trainees and mentors)
8. Participate in one of the following activities for recruitment of minority trainees (for mentors only): interviewing candidates, hosting summer students, training IMSD students, or visiting minority colleges.

Funding: The grant only pays a portion of the predoctoral trainee stipend; supplements may not come from any federal grant funds and are the responsibility of the mentor. Due to increases in the cost of health insurance, the grant can only cover the trainee. Spouse and family members will have to be paid for by the trainee.
