Spotlight

What would you do if faced with an illegal interview question? What is considered an illegal interview question? Find out more from [this article](#) from the NIH Office of Intramural Training and Education blog.

Here's a sneak peek:

[M]any illegal interview questions come out unintentionally in a conversational tone. As an example, an interviewer could start the interview with some ice breaker type questions and say, "You have such an interesting name! What's the origin?" Outside of an interview, this would be a pretty innocuous question; however, within an interview, it could be construed as trying to ascertain your nationality.
