### Spotlight

One of the most popular breakout sessions at the 2014 Career Symposium was "Managing a Lab," which included tips on day-to-day operations of two speakers' labs. Why would this be important at a *career* symposium?

As Kate Yandell in "*The Scientist*" explains:

---

*The strong ties and shared values fostered in a tight-knit lab... can help make the difference between a highly successful career and a lackluster one-both for the lab's principal investigator and for its members.*
