Emerging Scholars Lecture

“K63 Ubiquitin and the Regulation of Translation in Response to Oxidative Stress”

Gustavo Silva

Assistant Professor of Biology
Duke University

Ubiquitin is a prominent post-translational modification, which signals extensively beyond protein degradation. In this talk, Dr. Silva will present his research on how ubiquitin modifies ribosomes and controls cell resistance to stress.

Thursday

March 1, 2018

4:00 p.m.

206 Preston Research Building

This lecture series features the most promising young scientists who are making notable discoveries as postdoctoral fellows or early career faculty.
